

TRACTIFY — COLD CALL CHEAT SHEET

tractifyhq.com/schedule/book · July 2026

1 THE OPENER — Say This. Then Stop.

THE LINE ■	"Hey [name], my name's Jose — quick question, are you currently buying booked jobs?"
After you say it	STOP. Let them respond. The silence is intentional. Do not fill it.

2 THE TWO PATHS

IF NO or "not interested"	"No worries at all. I'll tell you what — save my number. When you're ready to have jobs booking straight onto your calendar automatically, call me back and I'll hand you the first 5 for free. No strings."
---------------------------	--

→ Then Hang up. Do not pitch. Do not chase. You planted a seed.

IF YES or any curiosity	"Perfect. Customers find you, pick a time that works for you, and it books straight onto your calendar. No missed calls, no phone tag, no chasing. Just jobs showing up while you're on the job site."
-------------------------	--

→ Pause 2 seconds. Then: "We're plugging in 2 contractors in Seattle right now, completely free — first 5 booked jobs on us, zero risk on your end. You got 15 minutes this week to see how it works?"

IF MURKY — "what do you mean?" / "how does that work?"	"Basically — customers find you, pick a time from your calendar, and it books automatically. You just show up to the job. No back and forth. We're proving it free with 2 contractors in Seattle right now. You'd be the second. 15 minutes this week?"
--	---

3 VOICEMAIL — Under 20 Seconds

LEAVE THIS	"Hey [name], Jose here. Save my number — when you're ready to have jobs booking onto your calendar automatically, call me back and I'll give you the first 5 for free."
Rule	Short. No explaining. No pitching. Just the outcome and the offer.

4 THE SALES CALL OPENER — Say This Before Anything Else

OPEN WITH ■■	"Before I say anything — you just booked this call the exact same way your customers are going to book jobs with you. That's the whole product right there."
Why it works	They already experienced the product. Everything after this is just answering questions.

5 OBJECTIONS

"How much does it cost?"	"Nothing right now — we're doing 2 free buildouts for case studies. First 5 booked jobs on us. If you love it, we keep going. If not, no hard feelings."
"Send me some info"	"Totally — the fastest way to actually see it is a 15-minute call. I can walk you through it live. You got time this week?"
"I take every call myself — I don't know how long jobs run"	"That's exactly the problem. When you're on a job that runs long, customers can't reach you and they move on. With this, you set your open time slots — Tuesday 2pm, Thursday 10am, whatever. Customers pick from what you have open. You control the schedule, you're just not stuck by the phone."

They have a voice agent / auto-attendant ■	<i>"A voice agent is a fancy voicemail. Customers still can't book — they still have to wait for you to call back. This gets booked jobs onto your calendar automatically."</i>
"We get all our work from referrals"	<i>"Referrals are gold. This doesn't replace them — it captures the ones that can't reach you while you're on a job."</i>
"I'm too busy right now"	<i>"That's the best problem to have. This is for when it slows down — and it always does eventually."</i>
"I already have online booking"	<i>"Is it live availability or preset windows? The difference is if you're booked Tuesday morning, customers can't pick Tuesday morning. It syncs automatically with your actual schedule."</i>
